PROJECT DOCUMENTATION

TOPIC : "TRACING THE GROWTH OF THE GLOBAL COMMUNITY: A POPULATION FORECASTING ANALYSIS"

1 <u>INTRODUCTION</u>

1.1 <u>OVERVIEW</u>

The world's population is more than three times larger than it was in the mid- twentieth century.This dramatic growth has been driven largely by increasing numbers of people surviving to reproductive age, the gradual increase in human lifespan , increasing urbanization, and accelerating migration.Major changes in fertility rate have accompanied this growth.These trends will have far-reaching implications for generations to come.

1.2 <u>PURPOSE</u>

A community can be a safe place where you can share your thoughts and feelings with people who truly understand what you're going through.It can help you find answers to questions you may have been afraid to ask. And it can offer you support in difficult times when you need someone to lean on.

2.PROBLEM DEFINITION AND DESIGN THINKING

2.1 EMPATHY MAP

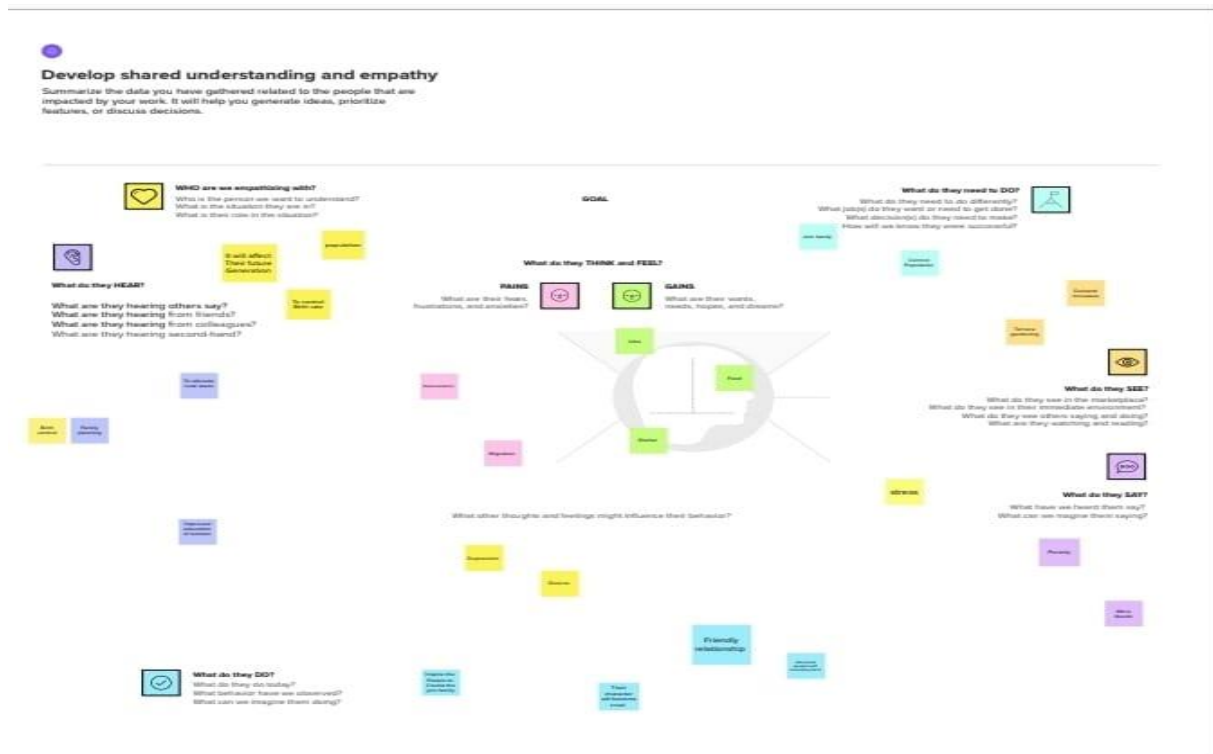

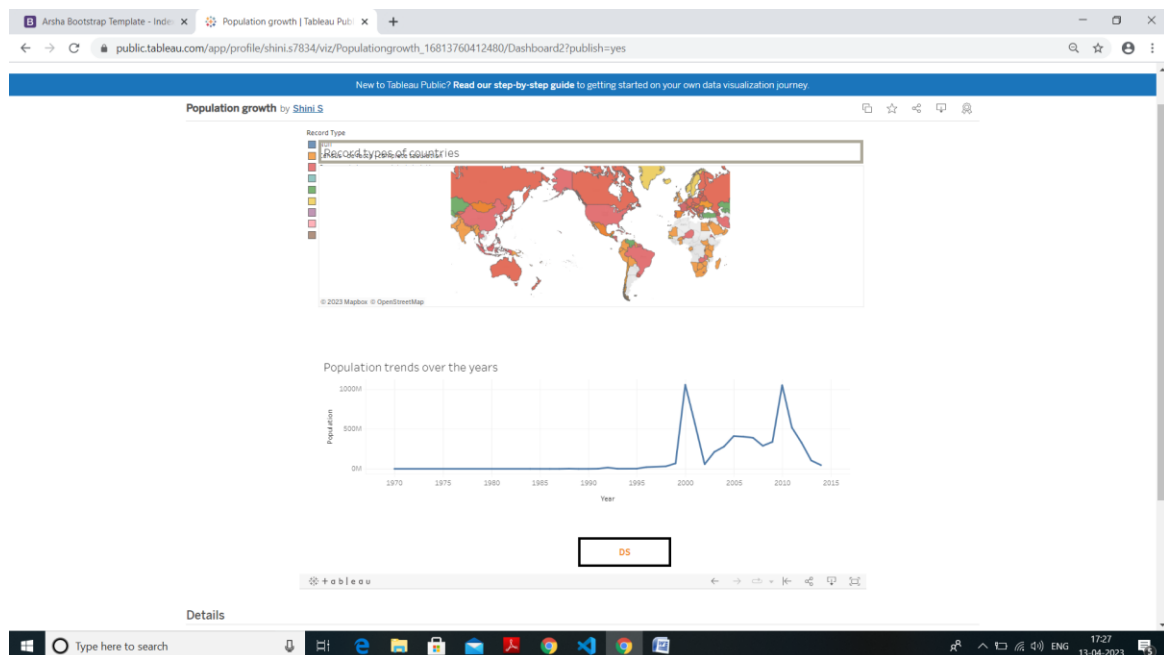

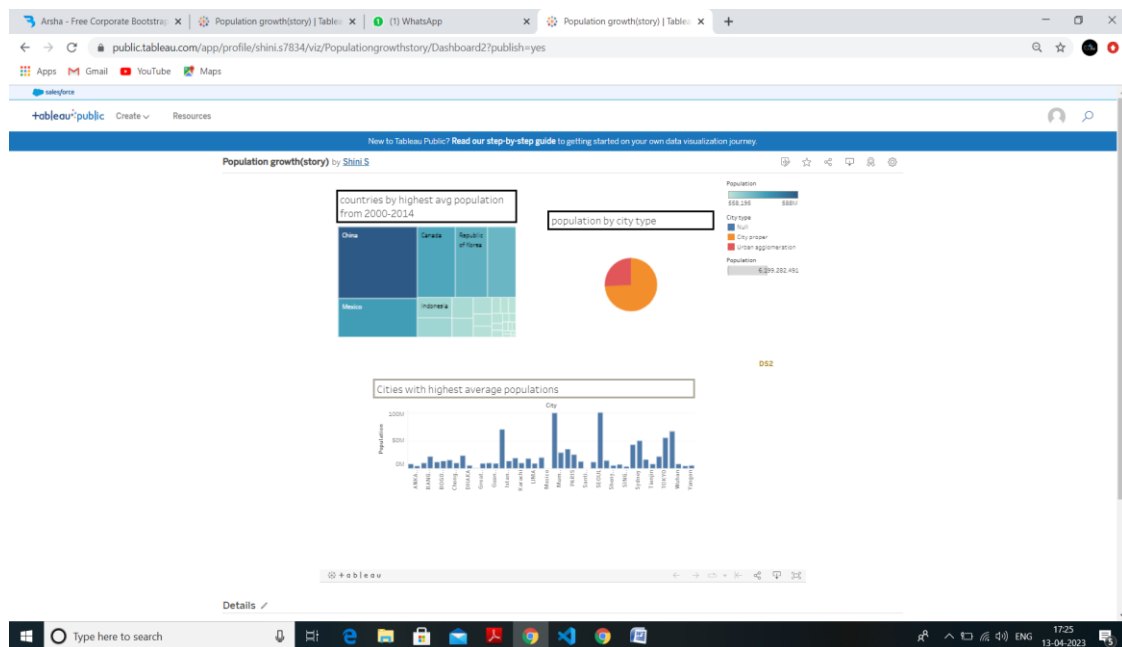

2.2 IDEATION AND BRAINSTORMING MAP
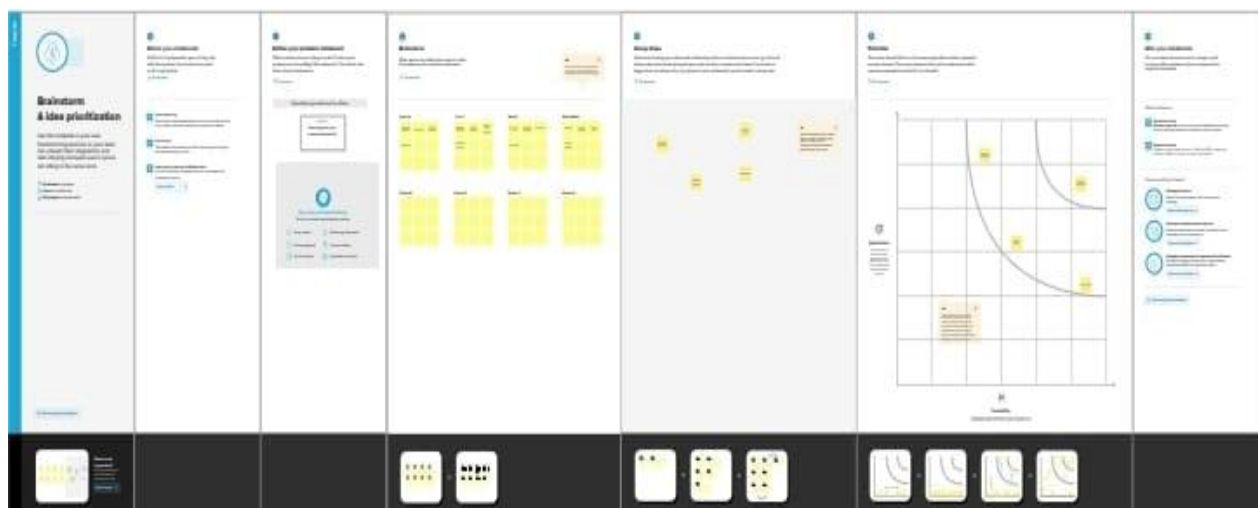

3 **RESULT**

1 TABLEAU PUPLIC

Created a tableau puplic account and imported the dashboard and story there.
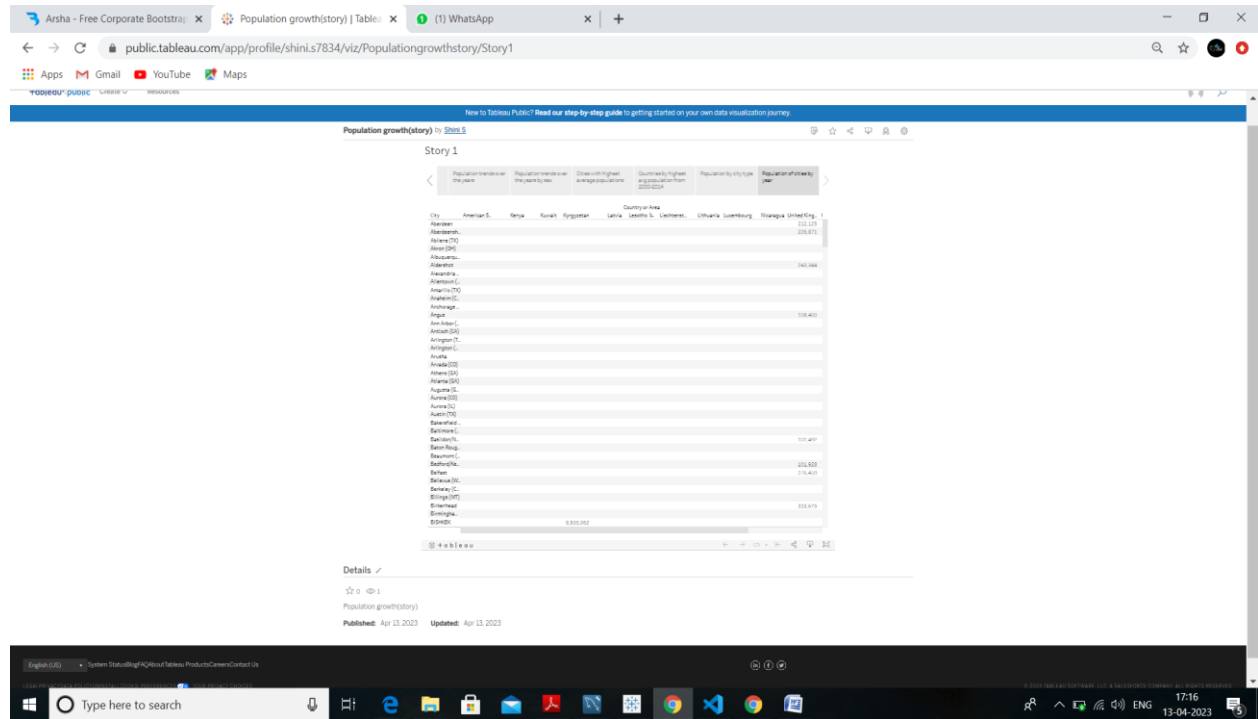

2 DASHBOARD

Created the dashboard by using the dataset.

3 STORY

Created story from the given dataset.

4 WEB APPLICATION

Used certain applications to establish a dashboard and story embed with UI Flask.
4 <u>ADVANTAGES AND DISADVANTAGES</u>

       Globalization gives businesses the opportunity to expand into new markets, reach international buyers, and increase revenue.

Over time, companies can experience saturation for demand of their products or services domestically. By expanding globally, they can continue growing by meeting foreign demand..

       Although free trade can increase a nation's wealth, it also increases competition. Local businesses must compete with multinational corporations that produce cheaper goods at lower costs, which puts them at a disadvantage.

At the same time, the increase in choices impacts buying behaviors, as customers expect high quality products at low prices. That means companies must continuously adapt to meet demands.

5 **APPLICATION**

People who look similar and have similar backgrounds can easily communicate with each other, but when people from different cultures come together, they learn each other's values and begin to understand each other.

6 **CONCLUSION**

In conclusion, the Internet stay at the position of consequence. It has affected our lives in many ways. The global community also has represented in many ways, include the future of the Internet, the American values and the role of the Internet. Their relationships are interdependent and interactional. So it's hard to say one without others. I think that in the infoemation age of today, the global community and the Internet will make a more wonderful future.

7 **FUTURE SCOPE**

The future of global governance will be mainly shaped by the following five factors: individual empowerment, increasing awareness of human security, institutional complexity, international power shift and liberal world political paradigm.
